AS-I Wizard Test Plan

master banks. Therefore, by decree, whenever a bank address greater to or equal than 32 will implicitly specify a write bank operation.

The bank to be written to is: Specified bank - 32

Example, if automated test program specifies bank 32, bank 0 will be programmed. If bank 33 is selected, bank 1 will be written to.

Sequence of events for initialization:

Module is created in the controlled using indirect addressing to access SD memory

Master pointer are specified to Ozzy via VB8130-8146

Ozzy master is created with command 0xff

Ozzy version number is programmed using command 0x15

Ozzy command status is set using command 0x16

Ozzy slaves are created using bank access

Ozzy master is now ready to use.
